COT DUAL-SOURCE + COMMERCIAL/RETAIL BREAKDOWN

Data: Week Ending November 3, 2026 | Analysis: November 6, 2026

Source 1 -- Leveraged Funds: CFTC TFF's speculative cohort (hedge funds/CTAs); Disaggregated Managed Money for GOLD/SILVER/CRUDE/NATGAS. **Asset Manager:** CFTC TFF's real-money institutional cohort (pension funds, insurers, mutual funds), tracked as its own series with its own net position/COT index/bias, same treatment as Leveraged Funds -- not available for GOLD/SILVER/CRUDE/NATGAS (the Disaggregated report has no Asset Manager category). **Source 2 -- Non-Commercial:** Tradingster Legacy Non-Commercial (broader spec group = Leveraged Funds + Asset Manager combined). **Commercial/Retail:** CFTC Legacy report's classic 3-way split (Commercial hedgers vs. large speculators vs. small/retail traders), same underlying Tradingster data as Source 2. **Third Source:** a genuinely independent, non-CFTC check where a free one exists -- OANDA position book (forex), Crypto Fear & Greed Index (BTC), EIA weekly crude stocks (Oil), EIA weekly natural gas storage vs. 5-yr average (NatGas). No free independent source exists for indices or Gold/Silver. **COT Index:** Larry Williams percentile over full history -- Bullish >=60 | Bearish <=40 | Neutral 40-60.

Smart Money Score -- Commercial / Asset Manager / Leveraged Funds vs. Retail

Weights: Commercial 50% (most reliable smart money vs. Retail), Asset Manager 30%, Leveraged Funds 20% (trend-following, weakest for a contrarian read) -- renormalized to Commercial ~71%/Leveraged Funds ~29% for GOLD/SILVER/CRUDE/NATGAS (no Asset Manager data). Score = weighted cohort index minus Retail's own index; positive fades Retail short, negative fades Retail long. Prior-week score shown for short-term direction (building/fading/flipping), not just current level.

Commercial (hedgers) IDX 95 (Bullish), Retail (non-reportable) IDX 53 (Neutral).

Analysis: Both hedge-fund sources (CFTC and Tradingster) are bearish -- this is crowd positioning, context only; the lean comes from Commercials (see This week). CFTC IDX=0 near historical bearish extreme -- crowd very one-sided short; contrarian squeeze risk is elevated. Non-Commercial IDX=0 also at bearish extreme -- broad spec group maximally short. Commercials (Bullish) and Retail (Neutral) disagree, though not both at a clean bullish/bearish extreme -- worth noting who's on which side of this move. Third-source check (Bullish) diverges from Source 1 (Bearish) -- institutional COT positioning and the independent check disagree.

Smart Money Score: Score -6, prior week +2 -- stable.

Third-Source Check: OANDA clients: 62.4% long / 37.6% short (Bullish) -- independent broker order book, not CFTC data.

This week (Nov 6):

Bullish COT setup. Commercials at an extreme long (IDX 95) vs. Hedge funds IDX 0, Non-Commercial IDX 0 at the opposite extreme (short). Lean Bullish with Commercials. Favor long v7 signals; no COT support for shorts.

Next week (Nov 10):

Bullish lean with Commercials holds through Nov 10 while Commercials stay at IDX >= 80 and the other side stays at the opposite extreme.

	Alignment: CONFIRMED		**Score: +7 (Neutral / No Edge) | Prior Wk: -3**	

4-Week Trend: Leveraged Funds net +7,608 -> +2,665 (-4,943 over 4 wks). COT Index 0 (Bearish). Leveraged Funds covering above-average pace. Non-Commercial (Tradingster, Leveraged Funds + Asset Manager combined) net +23,153 -> +21,251 (-1,902). COT Index 37 (Bearish). Commercial (hedgers) IDX 62 (Bullish), Retail (non-reportable) IDX 37 (Bearish).

Analysis: Both hedge-fund sources (CFTC and Tradingster) are bearish -- this is crowd positioning, context only; the lean comes from Commercials (see This week). CFTC IDX=0 near historical bearish extreme -- crowd very one-sided short; contrarian squeeze risk is elevated. Smart money (Commercial) is Bullish while Retail (dumb money) is Bearish -- classic contrarian accumulation signal. This directly contradicts the Bearish speculator-side read above -- weigh it before treating that as a clean signal.

Smart Money Score: Score +7, prior week -3 -- shifting.

This week (Nov 6):
